Tulsa World- 9/18/19

Guns in the hands of citizens and socialism are not compatible. Socialism makes slaves of the working people. In Europe, the income tax is 60% and 90% for overtime. Somebody has to pay the bill. They are treated like cattle. Government housing, food, medical, clothing, and some money for alcohol.

Socialism is oppressive with three current examples; Hong Kong, Venezuela, and France. The demonstrators only have rocks against guns. Our Founding Fathers knew this and provided us with the Bill of Rights to protect us from our own government. They also knew that evil people would try to gain control of our government by creating programs to recruit parasites to slop at the government trough and then to confiscate our guns. When the parasites outnumber the working people and the people are unarmed, socialism will be complete. The poor, simple souls that live in fantasy believe that if you take away the guns then Poof! Heaven! Just like taking away scissors from a toddler.

Since our government can't stop a million undocumented immigrants and thousands of tons of drugs from crossing our borders every year, they can't stop criminals from getting guns. Do they not understand that the cartel can fill the need for guns? If guns are taken away, the people are helpless against evil.

Butch Webb, Owasso
